

How do I log in to Adobe Creative Cloud?

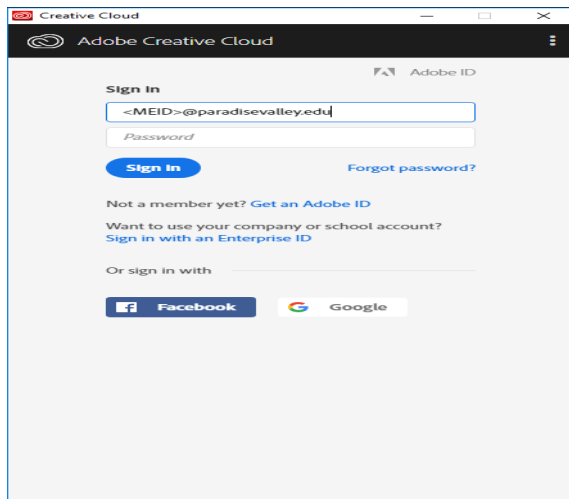

In order to use any Adobe software (including Acrobat, Photoshop, Dreamweaver, etc.) on PVCC employee computers, employees will need to sign in to Adobe Creative Cloud. Please follow the instructions below:

To access Adobe Creative Cloud:

1. First, launch the Creative Cloud app. You will see a sign in screen similar to the image below. Click on the link that says **Sign in with an Enterprise ID**.

2. The login screen will change slightly as seen in the screenshot below. In the field that says “Email address or domain name” enter your MEID@paradisevalley.edu.

3. When you attempt to enter your password, the login screen will briefly change to let you know it is redirecting you to our enterprise login page. A new login screen will open up as seen below. Sign in again with your MEID and password.

NOTE: If you get an error message that says Incorrect User ID or password, re-type the user ID and password once more. If you are still do not have a successful log in, you will need to sign in with your **FIRSTNAME.LASTNAME@paradisevalley.edu** or **MEID@maricopa.edu** and password instead. *If all options fail, please contact the Helpdesk at 602-787-7780. Your account needs to be added to the system.*

4. After you successfully authenticate, you will be guided back to the Adobe Creative Cloud application in your menu or taskbar and it will now show that you are logged-in as shown below. You may now use, or install any Adobe product.

**In some cases, Creative Cloud may run a software update before finishing*
